### ASSEMBLY INSTRUCTIONS

- Step 1
- Place the Locking Top and Drawer Unit (#1) on its back. Carefully open the Locking Top and lay it back against the ground.
- Step 2
- Slide chrome legs (#2) into square holes in corners of Locking Top (#1) until bolt holes are aligned at top of legs.
- Step 3
- Determine on which side of the cart the side push handle (#17) will be mounted. Then, insert two long bolts (#7) with two flat washers (#10) into the aligned holes in handle, locking top and legs. Fasten nuts (#9) using flat washers (#10) and lock washers (#12). Repeat this procedure for other corners using short bolts (#8).
- Step 4
- Slide bottom tray (#16) onto legs and fasten as in Step 3.
- Step 5
- Mounting casters: Put the four casters in place. The two locking casters (Part #3) should be on one side of the cart (recommend same side as push handle) and the two non locking casters (Part #4) should be on the other (**Left or right side NOT front or Back**). Using the 16 bolts, 32 washers, and 16 fasteners (located in Casters Hardware Kit, Part #5) completely tighten the casters to the bottom tray using a 13mm socket and 14mm combination wrench for the bolt head. (Note: Bolt head and one washer should be on the inside of the bottom shelf, nylock nut and one washer will be on the caster side.)
- Step 6
- Return cart to upright position.
- Step 7
- Using the screws (#11) provided, install drawer handles by aligning pre-drilled holes in drawers with slots in handle. Tighten all screws securely.
